

# Diamond Blade

# Diamond Grinding Wheel

**The Kertz Diamond Blade Universal Performance** cutting disc guarantees dependable cuts across a wide range of materials, including aerated concrete, sand-lime brick, concrete, masonry, and brick. The diamond segments deliver exceptional cutting quality for both wet and dry applications. With a high-frequency laser-welded design and a segment height of up to 17mm, this blade offers extended service life and enables a substantial number of cuts.

## Application

- Designed for quick and precise cutting, even through the most challenging reinforced concrete
- Features laser-welded special groove segments to minimize heat buildup
- Effective for both dry and wet cutting applications
- Perforated blade reduces vibration and enhances cooling
- Compatible with angle grinders and cut-off machines

Item Number	Item Description	Size (mm)
KDBT-105	Kertz Diamond Blade Turbo 105mm	105x1,2x20
KDB-125	Kertz Diamond Blade 125 mm	125x10x22,2
